Register a free business account Create a free business account to purchase Please try your search again later.You can edit your question or post anyway.To calculate the overall star rating and

percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again. Please try again. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. Register a free business account Please try your search again later. It transmits periodic supervisory messages to alert the Central Station of system problems. Installed as a standalone communicator, the 7720ULFPLUS does not require the use of an additional fire alarm control panel. The 7720ULFPLUS can also be configured as a slave communicator, providing radio signaling only. Communication is accomplished via a oneway 900 MHz radio link. A contact closure is available to indicate a radio fault. The 7720ULFPLUS is listed under UL864 and meets NFPA72, Central Station Applications 1993 Edition, as well as Factory Mutual Requirements for Remote Station Applications. Standard System Features Transmission of all alarm and status messages to the master station network via radio signals, resulting in faster and more secure reporting. Six Style B Class B and two Style D Class A supervised zones. One Style Y Class B indicating output circuit providing a maximum of 500mA at 12 volts for polarized bells. Capability of configuring all zones as voltage trigger or dry contact inputs. Onboard 18VAC to DC power supply. With an added battery, will provide 24hour backup and minimum 5minute bell. One trouble buzzer with reset inside locked cabinet and latching trouble LED. One red cabinet with key lock. Electrical Voltage input 18VAC, 40VA Current drain 100mA standby; 900mA alarm Trigger input 3.

7 to 14 volts into 2k ohms NO ANTENNA INCLUDED. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness.
